THE PREMIER SUGAR MILLS & DISTILLERY COMPANY LIMITED

CONDENSED INTERIM UNCONSOLIDATED FINANCIAL INFORMATION FOR THE NINE MONTH PERIOD ENDED ON JUNE 30, 2026 (UN-AUDITED)

FUTURE OUTLOOK/ECONOMICAL CHALLENGES

The Company's sugar segment is expected to remain under pressure due to persistently high sugarcane procurement prices and increasing production costs. The continued expansion of the largely undocumented and tax-free commercial jaggery (gur) market has intensified competition for sugarcane, reducing cane availability for organized mills.

Management remains focused on optimizing production costs and enhancing sugar recovery. The Board expects that appropriate regulatory measures including sugar price deregulation and export quotas with a balanced policy framework will support the long-term sustainability of the organized sugar industry.

ACCOUNTING POLICIES

The accounting policies adopted in the preparation of these nine months condensed interim financial information are consistent with as applied in the preparation of the preceding annual financial statements of the Company.

ACKNOWLEDGEMENT

The Directors appreciate the dedication, hard work, and commitment of the Company's staff at all levels, and also extend their sincere gratitude to the Company's bankers and all stakeholders for their continued trust, cooperation, and valuable support.

FOR AND ON BEHALF OF THE BOARD

Director

THE PREMIER SUGAR MILLS & DISTILLERY COMPANY LIMITED

DIRECTORS' REVIEW REPORT

The Directors are pleased to present the un-audited condensed interim financial information of the Company for the nine months' period that ended on June 30, 2026. This condensed interim financial information is presented to the shareholders of the Company in compliance with the International Accounting Standard No. 34 "Interim Financial Reporting", the Code of Corporate Governance, under Section 237 of the Companies Act, 2017 and the Listed Companies (Code of Corporate Governance) Regulations, 2019.

FINANCIAL PERFORMANCE

The Company incurred a loss after taxation of Rs. 244.95 million for the nine-month period ended June 30, 2026, as compared to a loss of Rs. 322.87 million in the corresponding period last year, reflecting growth and improvement in financial performance. The improvement in results was primarily driven by a substantial increase in ethanol export sales following the successful upgrade and operational stabilization of the Ethanol Plant in January 2025.

Net sales increased to Rs. 2,991.54 million from Rs. 1,441.89 million in the corresponding period last year. Consequently, the Company achieved a gross profit of Rs. 259.08 million as compared to a gross profit of Rs. 16.61 million in the corresponding period last year.

The Ethanol Division generated an operating profit of Rs. 290.32 million during the period under review, which substantially offset the operational losses of the Sugar Division, which incurred an operating loss of Rs. 431.12 million due to high sugarcane procurement and production costs.

Furthermore, finance costs decreased to Rs. 169.40 million from Rs. 223.70 million in the corresponding period last year. The management remains optimistic that continued operational efficiencies, together with sustained ethanol export performance and prudent financial management, will further improve the Company's financial performance in the coming periods.

OPERATIONAL PERFORMANCE

ETHANOL DIVISION

The Ethanol Fuel Plant produced 14,015 metric tons of ethanol up to July 22, 2026. The upgrade has increased the production capacity to 65,000 liters per day of ENA and is expected to improve efficiency, boost sales, and enhance profitability.

SUGAR DIVISION

The Company commenced crushing operations from November 06, 2025 for a brief period of just 12 days and ended on November 17, 2025 due to limited sugarcane availability during the season. Consequently, it was not feasible to operate the sugar plant for a full season and management decided to suspend sugar operations. During this time, a total of 12,429 metric tons of sugarcane was processed, achieving a sugar recovery ratio of 8.08% and producing only 935.250 metric tons of sugar.
